

Aerial Work Platform

Aerial Work Platform - There are lots of accessories designed for forklifts that can be used in order to help expand the functionality of your lift truck and allow you to pick up things, handle materials with less effort or to accomplish clean-up jobs.

A few accessories were specifically designed for the blades themselves. For example, blade extensions can be utilized if you need a lot more blade length, which increases lifting capacity. Fork extensions come in lengths varying from forty eight to one hundred twenty inches. Rounded or triangular attachments are one more variety utilized when moving rolled material in order to make sure it does not roll off of the standard flat forks.

Examples of lifting accessories consist of pivoting and telescoping crane or boom attachments. They can come in several various styles and are usually used for transporting metal bars, lumber, poles and different kinds of bulky items. Other attachments like other styles of hook plates and hooks are available in order to pick up items using a chain or sling. Slab lifters and magnetic filters are other stuff that can be used together with hook attachments. Slab lifters are specialized accessories that are used for carrying different materials which are delivered in a sheet or slab format. Carpet poles and rug rams are other lifting tools which attach to your lift truck to make transferring rolls of carpet a lot easier. The accessory hooks onto the forklift's forks and has a pole which goes through the center of the carpet roll.

There are many kinds of forklift accessory intended for facility maintenance like for example snow blades. These industrial forks can be attached to front end loaders and used for transporting materials such as mulch, snow as well as dirt. Other common cleanup accessories consist of magnetic sweepers and standard sweepers. Standard sweepers comprise a broom that the forklift forks connect onto for sweeping large spaces such as factory floors, parking lots and warehouse. The magnetic sweeper is similar except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in areas where there is lots of metal fragments such as on shop floors for example. Sweepers have widths up to sixty inches and this surface area makes clean up easy and fast.

Material spreaders are other attachments utilized on lift trucks. These spreaders are helpful for a variety of applications like for instance spreading seeds, ice melt, rock salt, pellets, fertilizers and insecticides.

Another optional lifting accessory are work platforms. These can be utilized by numerous various companies daily. Platforms may differ in size from 36" x 36" to up to 60" x 60". Some units may be available and are capable of folding up and storing into a smaller place. Work platforms are designed to raise employees up to an overhead location making use of the forklift. Larger platform models have additional space for personnel so as to bring tools and other necessary stuff for the job. Normally work platforms are made of poly material or steel.
