

JLG Forklift Parts

JLG Forklift Part - Following retirement in the late 1960's, John L. Grove embarked on a cross country RV voyage. After spending numerous years establishing his family built crane company with his brother, John had no idea that this trip would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road trip.

During their trip, John reacquainted himself with former business acquaintances along the way. In combination with these conversations and a noteworthy event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a vast market for a product that could promptly and safely lift individuals in the air to accomplish upkeep and other building functions.

After returning from their holiday, John set up a joint venture with two of his friends and bought a metal fabrication company in McConnellsburg, Pennsylvania. Opening with a small crew of twenty workers, they fashioned and sold their first JLG aerial work platform in 1970. The business incorporates many of the simple design elements of that original lift into existing models.

JLG lift trucks have come a ways from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. These days, the business proudly continues to expand itself into many markets globally and develops new products to ensure clients are capable of being more efficient and perform in the workplace within a safer atmosphere.
